

## **GROWER RESOURCE AGENCIES**

### Poultry Water Quality Consortium

- Encourages the use of poultry by-products as resources rather than allowing the material to contribute to water pollution.
- Promotes cooperation and information exchanges between government and industry on water quality and by-product issues.
- Composed of representatives from: Southeastern Poultry and Egg Association, Natural Resources Conservation Service, Tennessee Valley Authority, and the U.S. Environmental Protection Agency.

The Consortium can be contacted at: HB-2C; 1101 Market Street; Chattanooga, TN 37402-2801; (615) 751-7292 or (615) 751-7479 (FAX)

### Southeastern Poultry and Egg Association

- Dedicated to the growth of the entire poultry industry.
- Extensive programs keep members informed of regulatory measures and technical advances made to the industry.
- Grants are available to help researchers discover and develop better production methods.

The Association can be contacted at: 1530 Cooledge Road; Tucker, GA 30084; (404) 493-9401 or (404) 493-9257 (FAX)

#### Natural Resources Conservation Service

- Administers national soil and water conservation programs.
- Provides USDA leadership to assist landowners implementing resource conservation measures.
- Provides technical support to landowners considering manure storage facilities, mortality disposal practices, and nutrient nutrition plans based on soils and crops.

The NRCS usually maintains a local office in most counties in the United States. Consult the local telephone directory under U.S. Department of Agriculture for the number and address.

# Cooperative Extension Service

- Provides research based information and technology to producers.
- Partnership with USDA and each states land grant university.

The CES usually maintains an office in each county of all U.S. states. Consult the local telephone directory under local government for the number and address.

## LAND APPLICATION AGREEMENT FORMS

The following agreement forms will help producers with manure management liability issues. The forms will allow producers to form cooperative agreements with other parties for handling and disposal of manure. The forms were taken from those in the North Carolina "Dry Poultry Litter" Handbook.

# $\textbf{Example 1}\\ \textbf{EXAMPLE SHARED RESPONSIBILITY AGREEMENT FOR LAND APPLICATION OF POULTRY LITTER}$

I. The conditions listed below protect water quality. These conditions apply to litter removed from poultry operations.

a. The litter must be managed to ensure that there is no discharge of the litter to the surface waters.  b. Litter will not be stockpiled within 100 feet of perennial streams or wells.  c. Waste sampling and providing a copy of the waste analysis to the applicator is the responsibility of the proinformation will be used in determining the application rate. The applicator will provide the waste analysis landowner or land user as appropriate.  d. Application rates will be calculated to not exceed the agronomic use or phosphorous needs whichever is most the receiving crop.  e. Litter will be applied at rates not to exceed the agronomic rate of the receiving crop.  f. Soils from fields receiving poultry litter will be sampled annually.  g. Soil pH for all fields on which litter is applied will be maintained in accordance with the standard soil test recommendations.  h. Record keeping for land application.  1) Records will be kept for three years of soil test and waste analysis.  2) Records will be kept for three years indicating the location of fields and rates at which litter is land application part I.  Print Name  Phone Number  Bignature  Date  Print Name  Phone Number  Signature  Date						
b. Litter will not be stockpiled within 100 feet of perennial streams or wells.  c. Waste sampling and providing a copy of the waste analysis to the applicator is the responsibility of the proinformation will be used in determining the application rate. The applicator will provide the waste analysis landowner or land user as appropriate.  d. Application rates will be calculated to not exceed the agronomic use or phosphorous needs whichever is most the receiving crop.  e. Litter will be applied at rates not to exceed the agronomic rate of the receiving crop.  f. Soils from fields receiving poultry litter will be sampled annually.  g. Soil pH for all fields on which litter is applied will be maintained in accordance with the standard soil test recommendations.  h. Record keeping for land application.  1) Records will be kept for three years of soil test and waste analysis.  2) Records will be kept for three years indicating the location of fields and rates at which litter is land application of fields and rates at which litter is land application part I.
